PROFESSIONAL SUMMARY

Business Analyst and Data Analyst with 3+ years of experience delivering requirements gathering, business process improvement, and analytics solutions across financial services and consulting environments. Skilled in Agile methodologies, SQL, Power BI, Tableau, Python, and AI-driven solutions. Proven ability to bridge business and technology teams, translate business needs into functional requirements, and deliver scalable, data-driven solutions that improve operational efficiency and decision-making.

TECHNICAL SKILLS

Business Analysis: Requirements Gathering, BRD, FRD, User Stories, Acceptance Criteria, User Acceptance Testing (UAT), Requirements Traceability Matrix (RTM), BPMN, Business Process Modeling, Process Mapping, Gap Analysis, Data Mapping, Functional Requirements, SDLC

Agile & Collaboration: Agile Scrum, Sprint Planning, Backlog Grooming, Release Management, Stakeholder Management, Stakeholder Communication, Cross-Functional Collaboration, JIRA, Confluence, MS Visio

Data & Analytics: SQL, Power BI, Tableau, Python, Excel, KPI Reporting, Dashboard Reporting, Data Validation, Data Storytelling, Root Cause Analysis, Business Process Improvement, Process Improvement, API Integration, Data Visualization

AI & Emerging Technologies: Generative AI, LangChain, LangGraph, OpenAI, RAG, FAISS, NLP, Prompt Engineering, Vector Databases

KEY ACHIEVEMENTS

- Authored 100+ user stories and acceptance criteria supporting digital lending platform enhancements at Accenture.
- Facilitated cross-functional requirements workshops with business, engineering, and QA stakeholders on financial services engagements.
- Supported full SDLC delivery, from requirements gathering through UAT and release sign-off, on enterprise financial services projects.
- Developed executive-facing dashboards and KPI reporting solutions using Power BI and Tableau to support data-driven decision-making.
- Built a Generative AI-powered, multi-agent business analysis platform using LangChain, LangGraph, and RAG architecture.
- Collaborated with cross-functional teams to translate business requirements into data-driven solutions that improved reporting accuracy and operational efficiency.

PROFESSIONAL EXPERIENCE

Business Analyst & Data Analyst | Macquarie Group (Contract) *Feb 2026 – Present*

Houston, TX (Remote)

- Partner with business stakeholders across finance and technology teams to elicit, analyze, and document business requirements and deliver scalable reporting solutions.
- Facilitate requirements workshops with cross-functional stakeholders, translating business needs into functional specifications and reporting requirements.
- Collaborate with data, engineering, and business teams to define KPIs, validate requirements, and support data-driven decision-making.

- Write and optimize SQL queries to analyze operational datasets, perform root cause analysis, and support business process improvement initiatives.
- Partner with engineering teams to document requirements for API-based data integrations feeding reporting dashboards and downstream analytics.
- Design executive dashboards and KPI reports in Power BI and Tableau, used by leadership to monitor business performance and support strategic decision-making.
- Collaborate with business and technology teams to improve reporting accuracy and streamline decision-making through data-driven dashboards.
- Led Agile ceremonies including sprint planning, daily scrums, backlog grooming, and retrospectives in JIRA and Confluence, ensuring delivery aligned with business priorities.

Business Analyst | Accenture *Feb 2021 – Nov 2023*

Hyderabad, India

- Authored 100+ user stories and acceptance criteria supporting digital lending platform enhancements, ensuring requirements were testable and aligned with business goals across the full SDLC.
- Created BRDs, FRDs, process flows, and requirements traceability matrices (RTM) to maintain alignment between business objectives and technical delivery.
- Facilitated requirements workshops with cross-functional stakeholders to define functional requirements, conduct process mapping, and identify gaps between current and future-state processes.
- Led Agile ceremonies including sprint planning, daily scrums, backlog grooming, and retrospectives; partnered with Product Owners, developers, and QA teams to prioritize and manage backlog delivery.
- Coordinated UAT execution, including test case scenario design, defect management, and stakeholder sign-off, supporting on-time releases across multiple lending platform enhancements.
- Performed data analysis using SQL, Power BI, and Excel to validate data requirements, conduct gap analysis, and support data-driven decision-making across lending operations.

PROJECTS

Sales Profitability Analytics Dashboard | *MySQL, SQL, Tableau, GitHub*

GitHub

- Designed a MySQL data model to consolidate sales, cost, and profitability data from multiple sources into a single analytics-ready structure.
- Wrote SQL queries to calculate profitability margins, sales trends, and product-level performance metrics.
- Built interactive Tableau dashboards with drill-down KPI views, enabling stakeholders to identify underperforming products and regions.
- Published source code and documentation on GitHub, demonstrating an end-to-end BI development workflow.

Generative AI Business Analyst Platform | *Python, LangGraph, LangChain, OpenAI*

GitHub | Live Demo

- Developed a multi-agent AI platform that automates requirements analysis, user story generation, risk analysis, and document intelligence workflows using LangGraph, RAG, and OpenAI technologies.
- Integrated a Retrieval-Augmented Generation (RAG) pipeline to ground AI-generated outputs in project documentation and reduce hallucination.
- Built specialized agents for document analysis, user story drafting, and requirements validation, coordinated through a central orchestration layer.
- Applied prompt engineering techniques to improve output consistency and relevance for business analysis use cases.

AI Resume Intelligence Platform | *Python, Streamlit, NLP, FAISS, OpenAI* GitHub | Live Demo

- Built an AI-powered web application using Streamlit to match resumes against job descriptions and generate ATS compatibility scores.
- Implemented semantic search using FAISS vector embeddings to identify relevant skills and experience matches beyond simple keyword matching.

- Applied NLP techniques to parse resume and job description text, extract key entities, and score alignment.
- Integrated OpenAI models to generate tailored interview questions based on resume and job description content.

EDUCATION

Master of Science in Business Analytics | University of North Texas *Dec 2025*

Bachelor of Commerce (B.Com) | Aurora Degree College, India
