Business Analyst | Requirements, Agile Delivery & Data Analytics

SUMMARY

Business Analyst with 5+ years across health insurance, banking, and enterprise analytics. Turns stakeholder needs into BRDs, user stories, and acceptance criteria, validates data at scale with SQL (8M+ claims records), and carries requirements through UAT and release.

WORK EXPERIENCE

Cigna Healthcare — Dallas, TX *Jul 2025 – Oct 2026*
Business Analyst

- Helped improve reimbursement accuracy by 18% by validating 8M+ healthcare claims records with SQL in Snowflake and Databricks, surfacing denial trends and payment integrity issues.
- Contributed to a 22% reduction in operational bottlenecks by mapping AS-IS and TO-BE processes across claims adjudication, provider reimbursement, prior authorization, and Medicare/Medicaid workflows and pinpointing the gaps.
- Supported a 96% business acceptance rate on healthcare application releases by planning UAT, triaging defects, running regression testing, and coordinating release readiness reviews.
- Turned needs from product owners, operations, compliance, and IT into BRDs, FRDs, use cases, user stories, and acceptance criteria for enrollment, eligibility, and claims applications.
- Gave business stakeholders clearer operational visibility by building Power BI and Tableau dashboards on claims processing, denials, and payment accuracy KPIs.

JPMorgan Chase — New York, NY *Apr 2024 – May 2025*
Business Analyst

- Improved GenAI customer-response accuracy by 25% and reduced unsuitable responses by 22% by evaluating AI-assisted responses through prompt testing and RAG-based review.
- Defined KYC/AML and regulatory reporting data requirements by documenting source-to-target mappings, validation rules, and data-quality checks.
- Wrote and prioritized user stories with acceptance criteria in Jira for cross-functional technology teams, then coordinated UAT, validated requirements, and documented defects.
- Found inquiry trends, escalation patterns, and service bottlenecks by analyzing service and transaction data with SQL; tracked resolution, escalations, and AI adoption in Power BI.

Accenture — Hyderabad, India *Aug 2022 – Nov 2023*
Data Scientist

- Forecast consumer-goods demand by analyzing sales, promotional, and supply-chain data in Python and SQL and applying Prophet and LSTM models, with experiments tracked in MLflow.
- Kept model inputs reliable by preparing, transforming, and validating datasets in Snowflake and investigating data-quality issues.
- Turned business questions into analytical requirements, presented insights to stakeholders, and supported delivery of forecasts to downstream applications and reporting.

EA Sports — Hyderabad, India *Aug 2020 – Mar 2022*
Business Analyst Intern

- Supported senior Business Analysts by clarifying requirements in stakeholder discussions, documenting business workflows, drafting user stories, and maintaining requirements trackers.
- Prepared meeting notes and UAT documentation, and followed up on defects with technical and QA teams in Agile delivery.

SKILLS

- **Business Analysis:** Requirements Elicitation, BRD, FRD, User Stories, Acceptance Criteria, RTM, Process Mapping, BPMN, Gap Analysis, Data Mapping
- **Delivery:** Agile, Scrum, Sprint Planning, Backlog Refinement, UAT, Defect Tracking, Stakeholder Management, Jira, Confluence, SharePoint, Visio, Lucidchart
- **Data & AI:** SQL, Python, Snowflake, Databricks, Excel, PowerPoint, Power BI, Tableau, Data Validation, Data Governance, Data Lineage, KPI Reporting, Forecasting, GenAI Evaluation, Prompt Engineering, RAG

PROJECTS

Healthcare Claims Analytics Dashboard | *Live: sales-profitability-analytics-dashboard-4wasbu5ysg6tdzwcqm9isd.streamlit.app* | *GitHub: github.com/harikrupa-ai/sales-profitability-analytics-dashboard*

Built an interactive Streamlit dashboard on a 60K-record synthetic healthcare claims dataset — KPI tracking, denial-reason analysis, and payment-accuracy reporting by payer and provider, filterable by date, payer, claim type, and region. Python, Pandas, Plotly.

EDUCATION

University of North Texas — Master of Science in Business Analytics *Jan 2024 – Dec 2025*
Aurora Degree College, India — Bachelor of Commerce *2019 – 2022*
